

The Long Hauler™

The Latest News from J&J Truck Bodies & Trailers • Volume IX, Issue 1 • January - March 2008

J&J Demolition Dump Trailers Are Built with HARDOX® Steel

The DynaHauler/DT dump trailer is built to work in abusive job-site conditions hauling heavy demolition and construction debris. It's constructed of top grade materials like 3/16 inch HARDOX® 450, 175,000 PSI minimum yield and abrasion resistant steel side panels. The floor is 5/16 inch HARDOX® 450 plate, 175,000 PSI. With standard specs like these, you can depend on this workhorse for many years of hard hauling work.

Smooth Side Dump Trucks Go to New York

Shamrock Materials located in Staten Island, NY, purchased 5 Mack trucks from Bristol Donald, an authorized distributor of J&J Truck Bodies & Trailers. The chassis were mounted with polished aluminum smooth side dump bodies.

Smooth side dump bodies are an ideal solution if you're hauling aggregates such as asphalt, sand, stone, gravel, or coal. The reinforced interlocking double wall panels provide excellent insulation for materials like asphalt.

In addition, the interior wall is designed to absorb impact, while the outside of the dump body remains in good condition.

BUILT FOR THE LONG HAUL.™

J&J Builds the **DYNA SANDER™**

J&J Truck Bodies & Trailers designed and manufactured this sand holding and conveying unit for an international oil and gas well stimulation company. The company uses the sand in a fracturing process, where a mixture of sand and water is pumped into the well at high pressure. As the rock formation around the well is cracked, the sand holds the cracks open so that oil or gas production is stimulated to higher levels. This unit holds (but does not transport) over 200 tons of sand.

McDevitt Truck Sales orders dump body for university in Connecticut.

McDevitt Truck Sales, Tewksbury, MA provided this Peterbilt chassis and J&J mounted a stainless steel medium-duty dump body on it. The dump body is 11 feet long, 96 inches wide, and 30 inches high. Stainless steel is a great choice for trucks that will be used in severe weather road maintenance and other similar applications.

Pooler Enterprises, Inc. is a general sitework contractor located in Fishers, a suburb of Rochester, NY. They provide a variety of land development and construction services throughout New York State.

The company offers a full range of construction services, which include estimating, land clearing, earth moving, installation of utilities (sanitary, storm or water), asphalt, foundations, structural concrete and flatwork.

Sitework Contractor Orders Two J&J Pup Trailers

Double Side Braces for Heavy-Duty Hauling

The DynaHauler/HCX is a high performance dump truck body built with reinforced vertical AND horizontal side braces making it ideal solution for your heavy construction and hauling work. At J&J, we can custom build to suit your specific application.

Heated Dump Bodies!

Many in the hauling industry believed heated dump bodies were a thing of the past due to new emission regulations. However, the innovative engineering group at J&J has created our best heated dump body option ever!

J&J's heated dump body option features an in-cab LED screen that monitors exhaust temperatures at the dump body and automatically shuts down exhaust flow to the dump body during the extremely high temperatures reached during DPT regeneration. The heat system can be manually turned on and off from the in-cab console and the system automatically shuts down when the PTO is engaged.

Trust J&J to bring you the latest technology to keep you rolling when "Old Man Winter" and the regulatory authorities are trying to shut you down with frozen or cold loads.

Patent Pending

New Trucks for Garrett County, Maryland

The Roads Department of Garrett County, Md. purchased four Sterling trucks from Freightliner of Hagerstown and J&J

mounted polished aluminum dump bodies and installed Henke plows on all four units. The Roads Department is responsible for

road maintenance and construction work throughout the county.

New Dump Trailer for Butterfield Contracting

Rick Butterfield recently drove his new International Eagle tractor to J&J's plant and picked up his company's new J&J smooth side polished aluminum dump trailer. Rick is retired from both the Army and the New York State Police and is now carrying on the family trucking/livery business that was started by his great, great grandfather in 1860.

DynaHauler is a registered trademark of Somerset Welding & Steel.

There's no substitute for a dump truck body or trailer manufactured by J&J Truck Bodies & Trailers.

Custom Lube Trucks Repair and Maintain Equipment on the Job Site

These units reduce downtime by keeping your equipment running on the job site.

Lubrication trucks are specially designed and built to operate in extremely harsh conditions that are often times found in construction sites, quarries and mines, and oilfield and gasfields. This unit is fully enclosed and heated and features high output product pumps.

Having a truck like this cuts maintenance costs, reduces man hours and extends equipment life.

J&J Truck Equipment has been manufacturing extreme duty lubrication trucks for over 20 years. This year, we have completely redesigned a new line of lube trucks paying close attention to overall quality, serviceability and operator comfort and ergonomics. Our new design can be finely tailored to each customer's application in order to maximize operation efficiency.

New Packer for Berlin, PA

Using Berlin Boro's existing GMC chassis with packer in place, J&J Truck Equipment staff removed the old packer along with the hydraulic system. The chassis frame and suspension was sand blasted cleaned, primed and painted, and a new hydraulic system (PTO & pump) were installed. A new EZ-Pack 25 cubic yard high compaction refuse packer was installed and upgraded with a rear camera vision system with in-cab monitor.

At J&J Truck Equipment, we provide our customers with customized truck equipment solutions for their specific hauling applications.

Dig, Load & Mow with the GC2310!

Only Massey Ferguson could build a sub-compact with the heart and soul of a full-size tractor. The GC2300 and GC2310s are designed to make short work of big jobs. Yet, their compact size and versatile handling make them ideal for hobby farmers, landscapers, homeowners and subcontractors.

What's more, with the GC2310, all three attachments - front end loader, backhoe and mower - can be mounted at the same time, so you can dig, load and mow with one machine! Do all of your jobs for a fraction of the cost!
