

ROLL-OFF

Roll-off hoist trucks are ideally suited for transporting solid waste containers.

J&J roll-off cable-style hoist trucks are built for customers who transport solid waste containers to and from waste processing facilities. Most times the containers are used at construction sites, industrial locations and other areas where a large amount of trash and debris need to be removed. J&J offers two models of heavy-duty roll-off hoists with lift capacities of either 60,000 or 75,000 lbs. Popular options include tarping systems, additional valve spools, extendable tail, auxiliary axles, rearview cameras and monitoring systems, and tool boxes.

Rely on our experience.

There's no substitute for a roll-off hoist manufactured by the experts at J&J Truck Bodies & Trailers. We don't cut corners and we don't compromise on quality. Rely on our 45+ years of experience to build you the roll-off hoist you want - we'll build it to your specification and application.

DYNAHAULER®

Hoist frames can be configured either with a fixed tail or an extendable tail.

ISO 9001:2000 Certified.
