

LWC

DYNAHAULER® SERIES

A strong, lighter weight steel solution for your material hauling needs.

Light weight, crossmemberless steel dump bodies are becoming an increasingly favorite choice for owners and operators. Since the DynaHauler®/LWC is built with HARDOX® steel and has no cross members, it lets you haul more payload without compromising the structural integrity of the truck. The dump body is installed on an oak cushion or rubber cushion (optional) and features newly designed formed bottom rails.

Rely on our experience.

There's no substitute for a truck body built by the experts at J&J Truck Bodies & Trailers. We don't cut corners and we don't compromise on quality. Rely on our 50+ years of experience to build you the dump truck you want – we'll build it to your specification and application.

The special qualities of HARDOX® steel contributes to making this body a lighter weight, yet extremely strong solution to your hauling needs.

*Standard specifications may vary according to customer preferences and requirements. At J&J, we custom build to suit your needs.

Crossmemberless body greatly reduces the weight of these trucks.

Optional 3-way barn door style tailgate features a ground control release for fast and easy opening.

Sherwin-Williams Genesis® paint system provides a high gloss, extremely durable and resistant finish. All steel bodies are completely sandblasted for superior paint adhesion.
