

Safe, patented horizontal
ejection technology...**never**
raise a bed again!

A game changer for snow and ice control.

The Horizontal Ejector is a revolutionary new snow and ice control truck. The Horizontal Ejector technology eliminates the risks associated with overhead obstacles, reduces driver distraction, has a low center of gravity and prevents roll-overs that can occur from raising a dump body in unsafe conditions. The horizontal ejector is a lower cost, easier to maintain solution compared to other "conveyor / auger" bodies currently on the market.

Rely on our experience.

There's no substitute for a truck body and ejection system built by the experts at J&J Truck Bodies & Trailers. We don't cut corners and we don't compromise on quality. Rely on our 55+ years of experience to build you the truck bodies you want - we'll build them to your specification and application.

Truck Type	Overall Bed Length	Body Length	Side Height	Cubic Yard Capacity
Single Axle	12'	10'	42"	8 cu. yd.
Tandem Axle	16'	14'	48"	14 cu. yd.

*Standard specifications may vary according to customer's preferences and requirements. Many options available. **Call your J&J sales representative today!**

FEATURES	
J&J DynaControl® Hydraulic System	AutoFeed - Automatically moves ejector rearward to keep spreader full. AutoStop - Ejector stops when spreader is full.
J&J AWARE™ Camera System	Operator visibility of ejector position and operation. Operator visibility behind the truck while in reverse.
TCP Coating	Prevents corrosion on all cylinder stages.
Simple	Components, service and maintenance.
Double Acting Highlift Tailgate	Conventional Mode - Standard ejection and material spreading. Highlift Mode - Clear frozen material in snow and ice applications or eject bulky oversized material.
Full Summer Use	Without having to protect conveyors or augers.

Understructure: **J&J BODY ARMOR CR50**
