

Many options are available for this 40-ton capacity off road hauler. See back for details.

Increase productivity and maximize profit.

The efficient and purpose-built design of our dump body and chassis combination allows for speed and stability while providing increased productivity per cycle and maximum profit per ton hauled. The dump body is constructed of steel and is designed to handle the most extreme materials.

Rely on our experience.

There's no substitute for a truck body built by the experts at J&J Truck Bodies & Trailers. We don't cut corners and we don't compromise on quality. Rely on our 55+ years of experience to build you the dump trucks you want - we'll build them to your specification and application.

For a complete list of options, call J&J today!

The low profile sides are designed for easy and efficient loading with a scowled end to secure large boulders and reduce hydraulic cylinder stress upon boulder impact.

The auto lift tailgate maximizes material loading while the full cab guard protects the operators in the cab from falling debris.

HOIST AND HYDRAULICS

Front Mounted Single Acting Four-Stage Hydraulic Cylinder
Hydraulic System Flow @ 1500 RPM: 41 GPM / 144 LPM
Hydraulic System Pressure: 2500 PSI / 172 BAR
Body Angle: 55 Degrees
Body Raise Time @ 1500 RPM: 18 Seconds
Body Lower Time: 16 Seconds
